

# Wave Energy Conversion

## Course outline

- Wave power technology
- Wave energy resource modelling
- Wave structure interaction modelling
- Wave energy conversion modelling
- WEC-Mooring modelling
- Analitical and numerical exercises
- Miniprojects
- Integrative project

## Audience

Any professional interested in energy's technologies with background in science or engineering.  
Students looking for a current research subject.

## Instructor

Jimmy Valencia  
MSc. Naval architecture and Ocean engineering U. Lisboa  
PG. Data Science U. Lisboa
